

## R&D ELECTRONIC TECHNICIAN

Are you passionate about electronic development, bringing products all the way into full scale manufacturing and do you want to help create the new infrastructure for e-vehicles?

We are looking for a skilled and ambitious electronic technician for our R&D department who will be a key person in the knowledge transfer between R&D and Manufacturing.

### Your responsibilities will include

- As a part of the R&D team you will be involved in the development of projects from kickoff to release, supporting the design engineers and getting a deep product understanding
- Specify manufacturing test equipment, either to be build in-house or with external partners
- Train operators in test, analyse and repair on new products
- Build guides for analyze and repair of returned goods and support repair technicians on more complex analyses
- Collaborating with colleagues in the supply chain on component qualification and validation of suppliers

### Your qualifications

- Electronic technician or similar with at least 3 years of relevant work experience
- You are a “hands-on” type of person and you must be comfortable working in a laboratory and with building prototypes
- You have experience in using measuring instruments such as oscilloscopes, power analysers, electronic loads, etc.
- Experience with power electronics would be an advantage
- Outgoing and positive attitude, and you thrive by working in teams
- Good communication skills in written and spoken English and Danish

### We offer

An interesting job in an ambitious and growth-oriented company. We have our own in-house electronics production, and one of our strengths is that, with this close integration of development and production combined with a "Go do it" attitude, we move quickly and safely from design to ongoing production.

Our organization is characterized by highly motivated, responsible colleagues. Freedom with responsibility is one of our key values, and you will find the working environment is informal, agile, and deeply founded on a good collegial spirit. Determined to attract and maintain the best talent, we encourage all to continuously learn new skills. We have a flexible attitude towards working hours, a policy for home-working and we offer a favorable salary and pension plan as well as health insurance.

### Application

Send your application letter and your CV via [job@converdan.com](mailto:job@converdan.com).

If you have questions regarding the position, contact CTO Jens Kiib on +45 21 41 58 04 or [jki@converdan.com](mailto:jki@converdan.com). All job applications are treated with full confidentiality.

### The process

We continuously assess applications received and hold ongoing interviews.
