

PROJECT MANAGER

Experienced R&D Project Manager with a passion for highly efficient Power Converters for EV-charging and Energy Storage Systems

As our new Project Manager, you will be a part of a strong interdisciplinary team and have a key position in the development of highly efficient power converters for Electric Vehicle Charging and Energy Storage systems.

As project manager, you will be managing NPD projects from the point of aligning specifications with the customer and all the way through to evaluating and closing the projects.

Your responsibilities will include

- ☐ Alignment of requirement specification in cooperation with customer and internal product owner
- ☐ Project planning and coordination across the full organization
- ☐ Optimize the project flow, ensuring good quality while balancing time to market, product cost, resources, and product features
- ☐ Inform and communicate at all levels and with all stakeholders
- ☐ Uncover and minimize risks in the projects
- ☐ Continuously work to improve our project framework, tools, and skills

Your qualifications

- ☐ You have a proven track record of technical project management, with a background in engineering
- ☐ Experience from managing NPD projects and products containing both hardware and software
- ☐ Focused with an energetic approach and with the ability to make a team work together towards a common goal
- ☐ You have experience with agile methods in project management.
- ☐ Outgoing and positive attitude, and you thrive by working in teams
- ☐ Effectively communicate in excellent written and spoken English and Danish

We offer

An interesting job in an ambitious and growth-oriented company. We have our own in-house electronics production, and one of our strengths is that, with this close integration of development and production combined with a "Go do it" attitude, we move quickly and safely from design to ongoing production.

Our organization is characterized by highly motivated, responsible colleagues. Freedom with responsibility is one of our key values, and you will find the working environment is informal, agile, and deeply founded on a good collegial spirit. Determined to attract and maintain the best talent, we encourage all to continuously learn new skills. We have a flexible attitude towards working hours, a policy for home-working and we offer a favorable salary and pension plan as well as health insurance.

Application

Send your application letter and your CV via job@converdan.com.

If you have questions regarding the position, contact CTO Jens Kiib on +45 21 41 58 04 or jki@converdan.com. All job applications are treated with full confidentiality.

The process

We continuously assess applications received and hold ongoing interviews.
